

Interactive Flair!SM

Phone and Web Integration

The phone and web become one.

Place your company ahead of the curve with **Interactive Flair.SM** Utilizing Advertel's combined Phone and Web services allows for consistency throughout your company's image. Using one vendor also includes built in savings of time and money!

Imagine the convenience of...

▪ **Built in user interface with control of both media**

A built in user interface allows you to have complete control over your advertising messages and website information. Apply updates anytime, day or night.

▪ **Similar system architecture throughout**

Customers appreciate consistency. Allow your customers to easily navigate between your phone and website with similar system architecture.

▪ **Recordings that appear on both the phone and the web**

Companies with Interactive Flair can feature their recordings on both the phone and the web! This means their recordings reach the largest audience possible. Yours can too!

▪ **Real time control**

Enjoy real time control over the information included in your phone recordings and your website.

+ 1 call for changes
+ 1 vendor for both media
= **Consistency & Savings!**
